Status of the Claims

1. Claims 1-20 are pending in this application.

Drawings

2. This application has been filed with 5 figures of drawings (4 pages) which currently are acceptable for examining purposes.

Election/Restrictions

3. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-6, 9-11, 14-16 are drawn to a method, a system, and a floppy disk for transferring computer data from a server to another server through a client computer, merely contains general steps of downloading, displaying, and communicating about those data (US classification 709/203).
- II. Claims 7-8, 12-13 are drawn to a method for selling a product on the Internet (US classification 705/26).
- III. Claims 17, 19-20 are drawn to a computer readable medium having price information (e.g., a floppy disk with non-functional descriptive material: price information) – US classification 705/20 - please also note that claims 17, 19 have 35 USC 101 non-statutory problems due to lacking a concrete subject matter).

4. The above inventions are distinct, each from the other because inventions I, II, III contain different and unrelated inventions as indicated by different US classifications (inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of

operation, or different functions, or different effects (MPEP 806.04, MPEP 808.01)). The inventions of Group I, and Group II have different operations. The invention of Group III is of such a breadth that it may be directed to any non-specific use of a computer-readable medium for any purpose.

Because these inventions are distinct for the reasons given above and the search required for Groups I, II, and III is not required for the others of Groups I, II, and III, restriction for examination purposes as indicated is proper.

Applicants are advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
